

ZsyioGPT * Official AI Models & API Reference Directory

A comprehensive index of all supported AI providers, direct API key portals, developer consoles, model IDs, documentation, and configuration templates for ZsyioGPT.

1. OpenAI (ChatGPT / GPT-4o / o1 / o3-mini)

Env: `OPENAI_API_KEY`

Description: Primary provider for cutting-edge general reasoning, code generation, audio, and vision intelligence.

Key Models: gpt-4o, gpt-4o-mini, o1-preview, o3-mini

Resource / Portal Name	Direct URL Link	Description & Purpose
API Keys Dashboard	https://platform.openai.com/api-keys	Create & revoke secret keys
Developer Console	https://platform.openai.com/dashboard	Project settings, rate limits & usage
Billing & Credits	https://platform.openai.com/settings/organization/billing/overview	Add funds & credit balance
Models Documentation	https://platform.openai.com/docs/models	Official model release specs
Pricing Details	https://openai.com/api/pricing/	Token pricing for input & output

2. OpenRouter (Unified Multi-Model Gateway)

Env: `OPENROUTER_API_KEY`

Description: Single unified API key accessing OpenAI, Anthropic Claude, Google Gemini, DeepSeek R1, Meta Llama 3, and Mistral.

Key Models: openai/gpt-4o-mini, anthropic/claude-3.5-sonnet, deepseek/deepseek-r1

Resource / Portal Name	Direct URL Link	Description & Purpose
Keys Management	https://openrouter.ai/keys	Generate secret key starting with sk-or-v1-
Main Dashboard	https://openrouter.ai/	Model catalog, rankings & latency
Credits & Billing	https://openrouter.ai/credits	Fund account via card or crypto
All Available Models	https://openrouter.ai/models	Browse 100+ active LLMs with pricing
Quickstart Docs	https://openrouter.ai/docs/quick-start	API schema & standard headers

3. Anthropic (Claude 3.5 Sonnet / Claude 3 Opus / Haiku)

Env: `ANTHROPIC_API_KEY`
(or `CLAUDE_API_KEY`)

Description: Industry-leading reasoning, coding capabilities, long 200k context window, and human-aligned outputs.

Key Models: claude-3-5-sonnet-latest, claude-3-5-haiku-latest, claude-3-opus-20240229

Resource / Portal Name	Direct URL Link	Description & Purpose
API Keys Console	https://console.anthropic.com/settings/keys	Create Claude secret keys (sk-ant-)
Anthropic Console	https://console.anthropic.com/dashboard	Workspaces, team & rate limit stats
Billing Plans	https://console.anthropic.com/settings/plans	Prepaid credits & payment methods
Model Overview	https://docs.anthropic.com/en/docs/about-claude/models	Latency benchmarks & capabilities
Claude API Docs	https://docs.anthropic.com/en/api/getting-started	Streaming & tool calling guides

4. Google Cloud & Google AI Studio (Gemini 2.0 / 1.5 Pro / Flash)

Env: **GEMINI_API_KEY****Description:** Ultra-large 2 Million token context, fast multimodal analysis (text, image, video, audio), with generous free tier.**Key Models:** gemini-2.0-flash, gemini-1.5-pro, gemini-1.5-flash

Resource / Portal Name	Direct URL Link	Description & Purpose
Get API Key (AI Studio)	https://aistudio.google.com/app/apikey	Instant 1-click free/paid API key creation
Google AI Studio	https://aistudio.google.com/	Prompt playground & multimodal testing
Gemini Models Hub	https://ai.google.dev/gemini-api/docs/models/gemini	Context window & technical metrics
Google Cloud Console	https://console.cloud.google.com/	Enterprise Vertex AI resource manager
Gemini API Pricing	https://ai.google.dev/pricing	Free tier quotas & paid tier rates

5. xAI (Grok 2 / Grok 2 Vision)

Env: **GROK_API_KEY****Description:** High-intelligence reasoning models with real-time world knowledge and uncensored analytical capabilities.**Key Models:** grok-2-1212, grok-2-vision-1212

Resource / Portal Name	Direct URL Link	Description & Purpose
xAI API Console	https://console.x.ai/	Create API key & manage organization
API Keys Portal	https://console.x.ai/api-keys	Generate xai- secret keys
Billing & Credits	https://console.x.ai/billing	Add enterprise or credit balance
xAI Documentation	https://docs.x.ai/docs	REST endpoints & completions specs
Grok Models Overview	https://docs.x.ai/docs/models	Supported parameter sizes & pricing

6. Media & Creative AI Engines (Image & Voice Synthesis)

Env: **STABILITY_API_KEY /**
ELEVENLABS_API_KEY /
REPLICATE_API_TOKEN**Description:** High-fidelity text-to-image synthesis (SDXL, Stable Diffusion 3.5) and hyper-realistic AI voice cloning.**Key Models:** Stable Diffusion 3.5 Large, Eleven Multilingual v2, Flux.1 Schnell

Resource / Portal Name	Direct URL Link	Description & Purpose
Stability AI Platform	https://platform.stability.ai/account/keys	Generate API key for SD3.5 & SDXL
ElevenLabs Voice AI	https://elevenlabs.io/app/settings/api-keys	Voice generation & realistic TTS keys
Replicate Cloud	https://replicate.com/account/api-tokens	Run open-source Flux.1, Whisper, Llama
Hugging Face Hub	https://huggingface.co/settings/tokens	Inference API access for community models

Quick Setup Guide: Configuring server/.env in ZsyioGPT

Copy the template below into your server/.env file and paste your valid secret keys. Note that ZsyioGPT automatically trims stray whitespace and auto-routes OpenRouter keys to OpenRouter's gateway seamlessly.

```
# ===== # ZsyioGPT API Configuration (.env) #
===== PORT=5000 NODE_ENV=development # 1. OpenAI or
OpenRouter Key # Direct OpenAI format: sk-proj-... # OpenRouter format: sk-or-v1-...
OPENAI_API_KEY=your_openai_or_openrouter_key_here OPENROUTER_API_KEY=your_openrouter_key_here #
2. Anthropic Claude (Format: sk-ant-api03-...) ANTHROPIC_API_KEY=your_anthropic_key_here
CLAUDE_API_KEY=your_anthropic_key_here # 3. Google Gemini (Format: AIzaSy...)
GEMINI_API_KEY=your_gemini_key_here # 4. xAI Grok (Format: xai-...)
GROK_API_KEY=your_xai_grok_key_here # 5. Media & Voice Providers (Optional)
STABILITY_API_KEY=your_stability_key_here ELEVENLABS_API_KEY=your_elevenlabs_key_here
REPLICATE_API_TOKEN=your_replicate_token_here
```

Troubleshooting Common API Errors:

Error Code / Message	Root Cause	Resolution in ZsyioGPT
401 Incorrect API key provided	An OpenRouter key (sk-or-v1-) was sent to OpenAI's endpoint, or key contains leading spaces.	Handled automatically! ZsyioGPT auto-detects sk-or- and redirects base URL to OpenRouter.
400 Credit balance is too low	The provider account (e.g. Anthropic/OpenAI) has \$0.00 credit balance.	Log in to the Billing portal linked above and add a \$5 prepaid credit balance.
404 Model Not Found	Model ID mismatch between direct provider and aggregator.	ZsyioGPT maps names like gpt-4o-mini to openai/gpt-4o-mini when using OpenRouter.
429 Rate Limit Reached	Too many requests per minute for the current tier.	Upgrade tier or switch model to a lighter model (e.g. gpt-4o-mini or gemini-2.0-flash).
